### **Scientel Wireless Changes Name to Scientel Solutions in Response to Growth**

CHICAGO, IL, JUNE 29, 2016 - Scientel Wireless LLC has officially changed its name to Scientel Solutions. The name change, and accompanying new brand concept, follows years of significant growth for the company. "We have evolved as a company and we're meeting client needs beyond wireless networks. What we really offer are comprehensive technology solutions, and a branding update will better reflect that," says Nelson C. Santos, President of Scientel Solutions.

Scientel Solutions is headquartered outside of Chicago in Lombard, Illinois. Within ten years of its founding, the company opened six additional offices nationwide to match company growth in Hawaii, Texas and New Jersey, with a seventh office opening to be announced soon in Fort Worth, Texas.

Scientel Wireless established itself around wireless network systems but Scientel Solutions offers expanded offerings such as video surveillance network solutions, police video, public safety MPLS, network switching and routing, and managed services. Scientel Solutions was recently awarded an IP/MPLS maintenance contract for the City of Fort Worth. The organization is currently supporting the city government's public safety data network for police, fire, EMS and animal control departments serving thousands of first responders.

Daisy Brand enlisted Scientel to improve its resource management and increase campus connectivity across multiple buildings. The secure intra-campus network improved the transfer of data from in-house utilities to monitoring animal welfare.

Other notable projects include an Internet of Things smart grid MPLS implementation for ComEd, point of sale connectivity for concert vendors and artists for Live Nation, and an internal network system for Sally Beauty Supply.

Scientel Solutions debuted its new logo last month as a premium tee box sponsor of the PCIA Golf Outing at the 2016 Wireless Infrastructure Show in Dallas, Texas to positive response and this month as a sponsor of the Hawaii Digital Government Summit in Honolulu, Hawaii on June 16th. In addition to telecommunication industry shows, Scientel also participated in Tech Month Chicago by hosting an Internet of Things and Education panel at tech incubator BLUE1647 which included Director of Engineering Michael Cataletto, Systems Engineer Lou Martinez, PinkThink CEO Makeda Ricketts and education administration consultant Nita Goodman.
