

# PROTECTING STUDENTS, FACULTY, & STAFF

# **SECURING**

# **SCHOOLS**

Creating future-proof solutions that  
tackle the unique challenges of  
educational institutions

# Why Clients Trust Us

As The Universal Integrator, we provide more than a simple solution. By incorporating our specialties into a holistic approach, our clients gain a systems integrator, support provider, and all-in-one consultant that offers 360 technology services that support dynamic communication, video, and data management.

We pride ourselves in being vendor agnostic, which allows us to source only the most effective products for our client's customized solution.

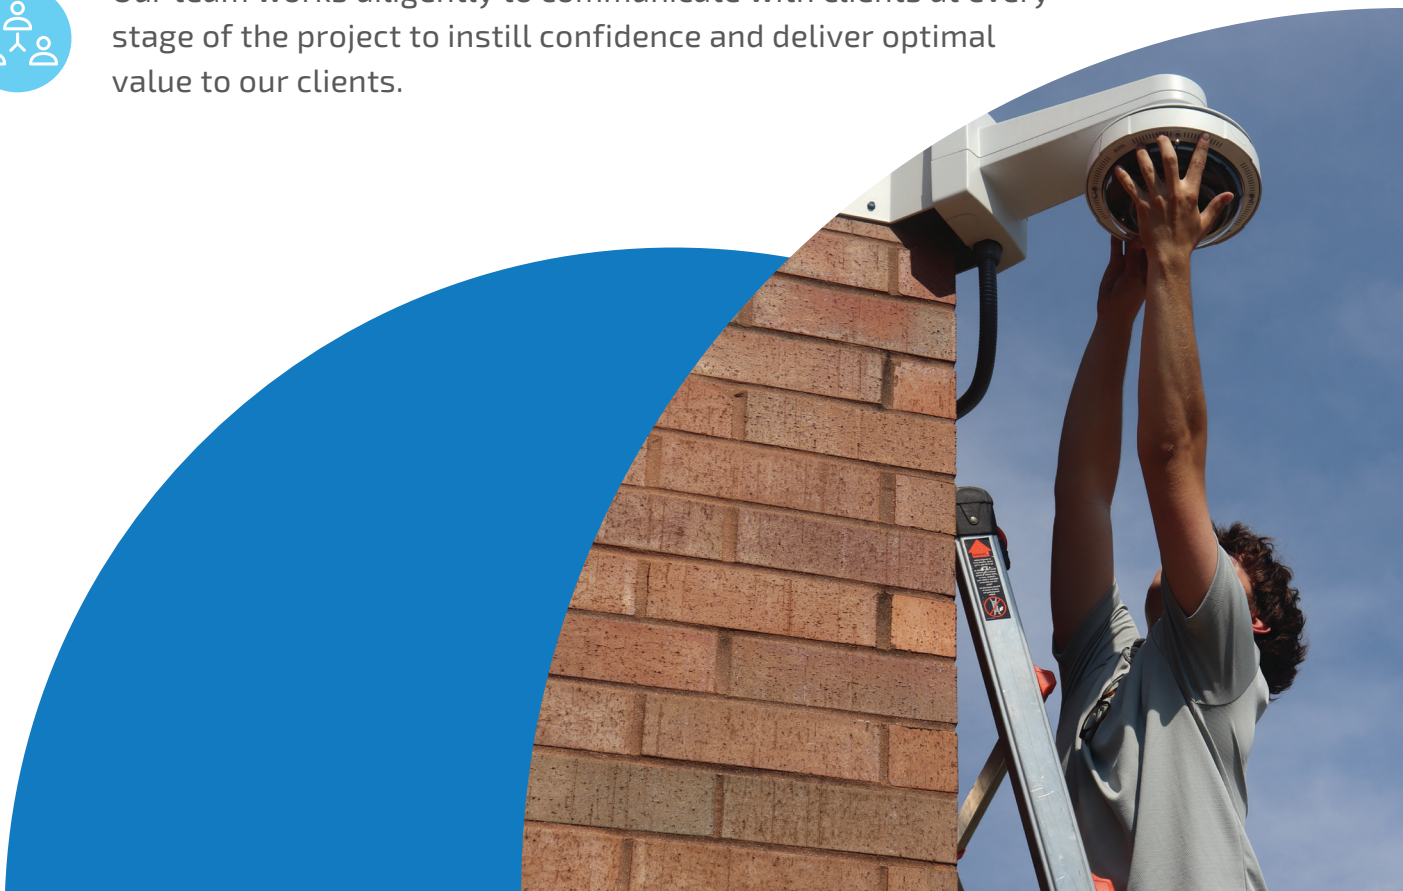

Our team of trusted professionals understand the unique challenges you face, and we know how to successfully create change within your environment.

Our staff is exceedingly knowledgeable, with extensive experience in the field of smart technologies and continues to support our customers long after the project is complete.

Our team works diligently to communicate with clients at every stage of the project to instill confidence and deliver optimal value to our clients.

# Security Cameras

As a technology-agnostic provider, we focus on delivering customizable **solutions tailored to your campus's unique security requirements.**

We design, implement, and support security camera solutions that adapt with your schools needs to enhance your facility's overall situational awareness.

**Our team works closely with customers to evaluate and understand their specific concerns and needs.**

By offering expert guidance, we help to select the most effective security cameras and related technologies that align with a customer's priorities. From there, we design a comprehensive, integrated security strategy tailored to protect students, staff, and property while fostering a safe and secure learning environment.

Whether it's expanding facilities, upgrading existing security infrastructure, or integrating new technologies, our solutions grow with you.

## BENEFITS OF SECURITY CAMERAS

- Enhanced Safety for Students & Staff
- Prevention of Bullying or Misconduct
- Quick Response to Emergencies
- Deterrence of Trespassing and Unauthorized Access
- Increased Accountability
- Cost-Effective

# Video Management Systems (VMS)

In today's educational environment, the selection and implementation of a Video Management System (VMS) is a critical step toward ensuring the safety and protection of students, staff, and school property.

Our tailored VMS solutions increase your school's ability to monitor its campus, respond to incidents promptly, and maintain a secure learning environment.

Scientel assists districts by upgrading their existing VMS or selecting, and installing a new platform designed specifically to meet their needs.

We understand the complexities of choosing the right system and work closely with educational institutions to ensure their VMS solution fits both current and future security requirements.

Our technology partnerships grant clients access to systems that offer custom layouts, multiple streams per camera, video analytic integrations, and more.

## BENEFITS OF VIDEO MANAGEMENT SYSTEMS

- Improved Situational Awareness
  - Data Analytics and Insights
    - Remote Access
- Improved Storage Options
  - Customization
  - Record-Keeping
- Centralized Control

# Access Control

Strengthen the safety of your school with our advanced physical security solutions designed to **regulate and safeguard access to your facility with state-of-the-art technology.**

Let our team develop a customized system that will regulate and secure access to your campus through predetermined entry schedules, personalized credentials, and real-time alerts for unauthorized access attempts.

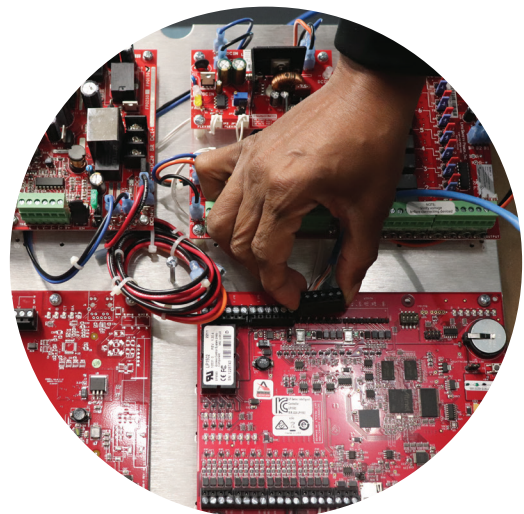

By integrating access control with video management systems, **we enhance your school's situational awareness**, offering a comprehensive and proactive security approach.

Whether your campus requires touchless entry, live alerts, or remote management capabilities, our future-ready systems and software are fully customizable.

Through partnerships with leading technology providers, we offer access to a variety of platforms designed to meet the specific needs of educational environments.

## BENEFITS OF ACCESS CONTROL

- Customizable Access Levels
- Improved Accountability
- Increased Operational Efficiency
- Remote Management and Monitoring
- Enhanced Safety and Emergency Response
- Scalability and Flexibility
- Regulatory Compliance and Risk Management
- Integration with Other Security Systems

# Additional Services

Enhance the safety of your students, faculty, and staff with our value-added services, designed to strengthen and complement our physical security solutions.

## License Plate Recognition (LPR)

Our LPR solution pairs with various recognition platforms to provide real-time alerts, conduct comprehensive searches, and leverage powerful analytics. LPR delivers reliable performance and actionable insights to keep your school safe.

## Video Analytics

Detect suspicious behavior and identify unauthorized access in real-time to enable a faster response to potential threats. Advanced features like facial recognition and motion detection help track activity across your facility.

## Halo Smart Sensor

HALO smart sensor is an Internet of Things (IoT) device that captures comprehensive data on air quality, vape and smoke detection, and audio detection capabilities. The sensor integrates into your schools existing security network.

## Gun Analytics & Alerting

Leverage your existing security camera system with our easily deployable early gun analytics and detection solution. With advanced AI technology, our solution identifies a threat in fractions of a second while instantly alerting security personnel.

## Concealed Weapons Detection (CWD)

Respond faster to critical events using built-in modular cameras and next-generation video analytics. Allowing up to 3,600 entries per hour, our solution locates hidden weapons and provides real-time alerts with 6 different metallic scan sensitivity settings.

# About Us

At Scientel, we partner with the world's leading innovators to design, implement, and support advanced solutions to complex challenges. Our knowledgeable, creative team serves clients across a variety of enterprise and government domains, specializing in Networking, Security, Lifecycle Management, and Drone Detection & Monitoring.

## Giving Back as We Move Forward

As we create a smarter future, we're committed to making the world a better place for everyone by donating both time and talent back into our community.

Our company contributes to numerous humanitarian initiatives by supporting local Veteran Organizations, Homeless Shelters, Educational Institutions, and other various initiatives meant to improve the well-being of people and businesses everywhere.

## How We Work

**COACH** – Our team works to guide our clients toward achieving their desired outcomes, pinpointing challenges, exploring opportunities, and developing a strategy tailored to their needs.

**DESIGN** – Our team merges industry-specific expertise, leading-edge technologies, and creativity to develop a complete, future-proof solution designed to achieve our client's desired outcome.

**IMPLEMENT** – Our team of trusted experts work extensively to bring our client's vision to life with minimal project disruption while providing a clear and detailed explanation of our process each step of the way.

**SUPPORT** – Our team provides ongoing maintenance, training, and upgrades to continually maximize value and help our clients to adapt to a changing world.

# Combating Evolving Threats with Multi-Layered Security Solutions

---

Our interconnected approach strengthens overall security while providing peace of mind, as it ensures that every potential vulnerability is addressed with a robust solution.
